

2019 CITIZEN-CENTRIC REPORT DIVISION OF PARKS AND RECREATION

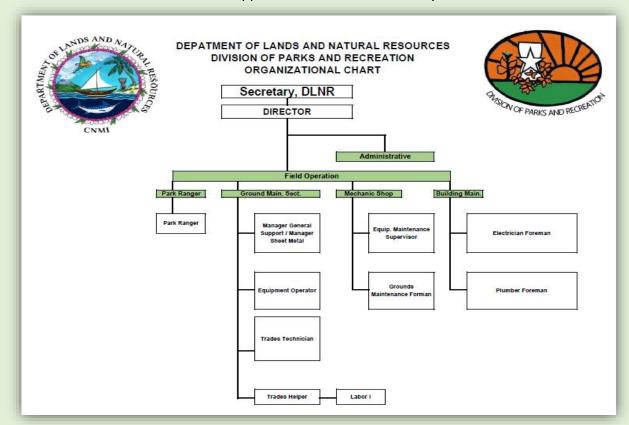

Who We Are: The Division of Parks and Recreation is under the Department of Lands and Natural Resources with mandated duties to upkeep public parks, recreational facilities and tourist sites. Division of Park and Recreation was established through the passage of Public Law 11-106, 14-27 authorizing and enabling the division to continue promoting sound management practices while complying with CNMI's Local and Federal laws where it's applicable. The division is additionally guided by the established and approved regulation chapter 85-50.1, to implement fee collection and enforcement throughout its identified jurisdictions

Our Vision

To avail the general public full access to enjoy nature at its best, granting opportunities to visit historical sites, structures and beaches that are significant to the Commonwealth of the Northern Mariana Islands (Saipan).

Operation Structure

- The division is staffed with 47-Employees respectfully.
- Four of these employees are under the Workforce Investment Agency (WIA) ... hired under Limited Term Appointment for 6 months only.

Strategic Goals:

To improve Live / Work / Recreation / Health / Diversity / Customer Service and Environmental Sustainability

To enhance the quality of life in the CNMI by providing exceptional parks and recreation experiences while preserving significant natural and cultural resources and its economic stability.

Parks & Recreation Values: Integrity, Community, Collaboration, Safety, Leadership, Positive Attitude

Improve CNMI's Quality of Life

Support the
Preservation of

- Participated in the SCORP development (on-going)
- Continue to maintain parks jurisdiction as mandated by law (on-going)
- Assist other government agencies with their immediate repair and maintenance needs

Competing Interests:

Parks and Recreational areas have been established by constitutional mandate and public laws to ensure that prime spaces under public land were maintained for community purposes and activities. Along with such acres developed exclusively for public recreational purposes, the neighboring vicinities have increased its land value by 100%, causing developers to race and retain private acres for hotels and other developments. These sureties assures private companies the potential to expand creating a booming economy in the CNMI.

Public input and analysis also identified a number of challenges to completion of individual projects as well as general direction about where the community would like to see action. The primary challenges of CNMI faces is the financial balance of moving projects forward and committing operations and maintenance resources to sustain the division once they were built.

Building Community Support:

While state budget may appear as an obstacle to creating the community's envisioned park system, the larger issue is ongoing operation and maintenance of the park system into the future. The most sustainable source of funding for both operations and maintenance is strong community support.

This support will need to be reinforced and converted into the necessary political and financial support (including fees and taxes) to implement Future Park System Plan. The specifics of how these strategies will be applied and the value in the CNMI will depend greatly on the projects selected.
