

CNMI HOMELAND SECURITY & EMERGENCY MANAGEMENT

ABOUT US

CNMI HSEM HISTORY

In 2005, Public Law No. 14-63 created and established the Office of Homeland Security under the Commonwealth of the Northern Mariana Islands (CNMI) Office of the Governor. It was not until 2013, when Public Law No. 18-4 reorganized the Office of Homeland Security and the Office of Emergency Management, unifying them to create the CNMI Office of Homeland Security and Emergency Management (HSEM).

OUR MISSION

To effectively manage incidents by coordinating and facilitating efforts among CNMI government agencies, federal partners, and non-governmental organizations. This includes preparing for, preventing, and responding to threats, crimes, hazards, and emergencies. The goal is to mitigate catastrophic events, ultimately protecting lives, property, and the environment.

OUR VISION

To build and train employees to exercise the capabilities of the organization, set the facilities, and execute all functions of an incident command system to advance a safer and more prepared CNMI.

CHALLENGES

COVID-19 Closeout Activities

COVID-19 closeout activities report, accountability, and processing of documents were time-consuming and preparations that delayed the reimbursement process. COVID-19 demobilization, disposition, and disposal process will continue to be closing out all pending obligations.

Financial Challenges

Although CNMI HSEM receives the bulk of its operational funding through federal funds, there are still many tasks that are inherent to the agency that cannot be supported through federal funding.

Austerity Measures

Due to austerity measures, CNMI HSEM projects and activities continue to be monitored and reviewed carefully.

Recent shift to La Nina

La Nina means a shift in tropical cyclone (TC) is predicted to keep TC activity below normal activity for the Marianas. In El Nino, most of the TC activity shifts eastward of the Marianas. In La Nina, TC activities will shift westward of the Marianas.

LOOKING FORWARD

More Classes and Training Opportunities will be offered in order to Maintain a Steady State of Rediness
